ULTRASONIC WATER METERS

15mm - 25mm

APPLICATION

The Ultrasonic meter range is designed for accurate measurement of cold and hot water consumption in households, apartment buildings, and commercial premises.

- Static method of water flow measurement, no moving parts.
- High accuracy calculation of water consumption.
- Eliminates measuring deviations caused by sand, suspended particles or airpockets.
- Long-term measurement stability and reliability.
- 9 digits, multi-line LCD. Total volume and instantaneous flow rate indication.
- Sensitive and accurate in low flows, down to 1 l/h.
- Ready for AMI/AMR with NFC, wM-Bus, LoRa and NB-IoT technologies.
